PROFESSIONAL SUMMARY

Data Engineering and Integrations Intern with hands-on experience in Python scripting, SQL optimization, and end-to-end ETL/ELT data pipeline construction. Proven track record in developing high-throughput data processing workflows, implementing data validation protocols, and conducting root-cause data quality analysis across large-scale datasets. Proficient in dimensional data modeling (Star/Snowflake), REST API integration, microservices architecture, and cloud data warehouse fundamentals (Snowflake, Databricks). Adept at working with Apache Airflow, PySpark, and iPaaS middleware, delivering robust data systems and clear technical documentation for business transformation teams.

TECHNICAL SKILLS

- Programming & Scripting:** Python (Core, Advanced, Data Manipulation, Scripting), Java, JavaScript (ES6+), C++
- Data Pipelines & ETL/ELT:** Data Pipeline Construction, Batch & Streaming Workflows, Data Profiling, Data Validation, Data Quality Assurance, System Integrations, Programmed Reconciliations
- SQL & Data Warehousing:** SQL Query Optimization, CTEs, Subqueries, Transformations, Dimensional Modeling (Star/Snowflake Schemas, Fact/Dimension Tables), Cloud Warehouses (Snowflake, Databricks awareness)
- APIs, iPaaS & Architecture:** RESTful API Design, Request/Response Patterns, Authentication Protocols, Boomi (basics), Middleware, Event-Driven Architecture, Integration Patterns
- Tools & Frameworks:** Pandas, NumPy, Apache Airflow (basics), PySpark (basics), Docker, Git, GitHub, VS Code, Linux CLI, MySQL, PostgreSQL, Looker Studio, Excel

WORK EXPERIENCE

Data Engineer & Analytics Intern

May 2026 – Jul 2026

Jharkhand Space Application Centre (Govt. of Jharkhand) — Ranchi, India

- Built and maintained scalable ETL data-processing pipelines using Python (Pandas, NumPy), processing and validating over 100,000+ spatial data records with zero loss.
- Standardized data quality checking procedures, performing root-cause analysis to resolve data anomalies and improve pipeline reliability by 35%.
- Engineered dynamic analytical dashboards and reconciliation reports using Looker Studio and Excel, reducing manual reporting overhead by 40% and accelerating executive decision-making.

AI & Data Engineering Intern

Jan 2025 – Mar 2025

Edunet Foundation — Remote

- Processed, cleaned, and evaluated complex LLM output text datasets using Python, developing custom data transformation scripts that achieved 95%+ metric accuracy.
- Constructed structured metrics for model performance evaluation, accelerating internal analytical review cycles by 25%.
- Maintained strict data confidentiality protocols while generating detailed technical reports and data lineage documentation for cross-functional stakeholders.

TECHNICAL & ENGINEERING PROJECTS

JIADA Land Allotment Portal [\[Live Demo\]](#)

Jun 2026

Tech Stack: PHP, MySQL, Leaflet.js, REST APIs, HTML5, CSS3, JavaScript

- Developed and deployed a full-stack e-governance platform for Jharkhand Industrial Area Development Authority (JIADA), integrating interactive GIS mapping to serve live government production users.
- Architected and optimized MySQL database queries across 50,000+ land records, cutting query execution response time by 40%.
- Designed secure RESTful API endpoints delivering structured JSON payloads, implementing strict data validation routines to enforce transactional integrity.

Legacy of Time – 3D Educational Platform [\[Live Demo\]](#)

Dec 2025

Tech Stack: React.js, JavaScript (ES6+), JSON APIs, HTML5, CSS3

- Built an interactive 3D web platform featuring a modular component architecture that improved frontend rendering efficiency and UI maintainability.
- Implemented dynamic data-driven content delivery by parsing JSON API responses, enhancing end-user data visualization and engagement by 30%.

EDUCATION

Vellore Institute of Technology (VIT)

Aug 2023 – May 2027

Bachelor of Technology (B.Tech) in Computer Science Engineering — CGPA: 7.72 / 10.0

LEADERSHIP & ACHIEVEMENTS

- Founder & President (Innovators' Club):** Led 500+ member organization at VIT; directed 15+ end-to-end software projects and mentored 50+ junior developers in programming best practices.
- Smart India Hackathon 2024 Finalist:** Ranked in the Top 5% nationally for building scalable software solution prototypes under time-constrained competition settings.
- Certifications:** Google IT Professional Certificate | Google Foundations of Project Management | Python for Data Science
